

"Networking helped me to widen the scope of my professional learning and my ASCE membership provides me the opportunity to network more effectively among fellow professionals."

— Moideen Mathari, P.E., M.ASCE
Principal Engineer, Somat Engineering Inc.
Adjunct Professor, Lawrence Technological University
Moderator of ASCE's LinkedIn Group

I'M AT HOME **SOCIAL NETWORKING** WITH CIVIL ENGINEERS. I'M HOME AT **ASCE.**

Moideen Mathari's spirit of volunteerism with ASCE dates back to the 1980s when he was an active member of the Saudi Arabian Chapter helping to build the Society's global network of civil engineers. In 2008, Moideen initiated the creation of the ASCE Group on LinkedIn to further facilitate communication between members of the civil engineering community and advance the science and profession around the world.

Through Moideen's commitment and passion for the civil engineering profession, the ASCE LinkedIn group has now grown to almost 18,000 members and is continuing to expand at a rate of sixty new members a day. This professionally-moderated and controlled group is the fastest growing LinkedIn group related to civil engineering. It was recently praised by LinkedIn for its professionalism making it a truly engaging and valuable social media outlet.
